

STATEMENT OF PURPOSE

Introduction

I am [REDACTED]. My father is [REDACTED] who is a government employee and works for Medical college as Accountant. I live in Amravati city, Maharashtra State, India along with a younger sister and my mother. I've completed my Secondary Schooling and Higher Secondary Schooling from Maharashtra State India.

I'm proud to say that it's my father's blessings that he never took his steps back to provide me the best support alongside to my efforts for best educational institutions for me. Even now, in order to pursue Master's in foreign university he is managing every help I could ask for. My mother is a housewife and supports me emotionally whenever my moral is low.

Academics and Extra- curricular activities

Bachelor's in Biotechnology appeared to be a lot more different than what I had previously imagined when I enrolled after my 12th to [REDACTED] affiliated to RTMNU. It was more demanding and challenging. Initially I faced many problems in learning which reflected in my bad scores and remarked backlogs. These numerous backlogs demotivated me a lot. But my parents and my friends helped me to get my confidence back and made me strong. Therefore, after gap of two years from 2016-2018 which was due to medical reason and backlogs I again took admission in Samarth Vidyalaya affiliated to Rashtrasant Tukdoji Maharaj Nagpur University in 2019. When I completed my first two years of graduation program, I had a clear vision of what this knowledge and learning would lead me in the coming future. The very first target I had put forward to myself was to use my learnings and ideas for the city Lakhni in Maharashtra State, India. During my final year me along with my group members took up the project which would change and develop the visual as well as economy perspective of Lakhni city. After a lot of

survey and guidance from our project guide we were able to rectify the Grow Green project practically.

We proposed that there is a possibility of growing plants in Lakhni, eventhough there were few challenges like variation in gradients, area requirements and many more. The reports and proposals along with projects were submitted to local government in order to execute them in reality.

In addition to, I have even bagged up many certificates related to other curriculum activities as well. I was actively involved in sports at different levels and was awarded as runner-up at Zonal Level in Nagpur Zone for Badminton sport. Won dance competition in an event known as Takshya 2017 at Adarsh Institute of Technology and Research Centre, Kambhale Maharashtra and Shivaji University, Kolhapur. At a science fest Nirmitti 2015, I've secured 2nd prize in Replica (poster making event) at Padmabhooshan Vasandraodada Patil Institute of Technology Budhgaon, Sangli. Additionally, I have shown active participation in sports carnival and national level fest of my college: Government College of Science, Lakhni.

With my leadership and management qualities I have successfully accomplished all the tasks as Co-ordinator of a National level science fest Aavishkar 2016. The management committee with my work was so impressed that for the next coming year I was elected as the Head for Aavishkar 2017 for event Intello-Struct. There were various challenges which were faced by team such as coordination among volunteers, ideas for event, management during and after closure of the National level science fest but we did it successfully. I've been to lot of other activities also such as skating, playing video games, watching series and movies and many more. Somehow, I managed my time for my hobbies and interests even in my busy days of life.

Why International Business course

To achieve greater goals and make my career brighter with perfection, I need to choose suitable environment and a good institute which could support and boost my already existing talent and knowledge by choosing the best program. Although I understand, I studied Bachelor of Science in Biotechnology but I have this

fascination of starting my own business in India which I want to grow exponentially and therefore I have chosen this course.

Why UK as study destination:

United Kingdom is ranked 2nd among the top three destination for overseas students for studies. The range of opportunities I can get by pursuing my Masters in university of United Kingdom shall be immense. Knowledge and skills I'm going to bag by studying in UK university and the support from faculty would rather be immense as UK universities are worldwide known for their teaching and support to students. To add cherry on cake UK offers 1 year of Master which is accepted worldwide.

Why not home country:

India definitely has wide range of finest universities and colleges but what I realised during my Bachelor program is that Indian institutions do provide less practical exposure to students. In addition, it is almost not possible to gain international benefits by considering myself solely to India colleges and universities for Masters. I need to get a wider approach as well as choices from which I can benefit a lot for my bright future and the wide exposure is only possible if I go out and study abroad as I will be learning and shall be independently managing my life.

Why Anglia Ruskin University

ARU is one of the best ranking universities ARU has been placed in the top 40 UK universities and in UK and is awarded for its teaching excellence. Also, is among top 10 universities in UK for Graduate employment. Additionally, it is one the oldest universities here in India.
