

Introduction

I grew up in [redacted] proudly observing my father expand his construction firm. Whether it was his strong work ethic, his never-give-up attitude, or his advice to believe in me, my father guided me on becoming the successful person I am today. When things went wrong, he prepared me to break the problem down into bite-size pieces and go ahead, taking on each piece one at a time until we resolved the issue. As a result, no problem was insurmountable and no goal out of reach. My love for his line of business started even before I realized it. After my twelfth standard, I was excited to do my diploma course in [redacted]. I then did my [redacted] in the same discipline and started working in my father's firm. During this time, I realized that we were still following traditional methods. The huge competition leads to losses that the company has to bear if not focused on financial management and strategic issues. Master's program can help me upgrade my skills and give me a platform that can help me to imply skills over the projects. I wish to learn the modern way to manage the project with minimal Finance and innovation in construction work.

Academic Background and Work Experience

With a lot of hope to learn and flourish, I kickstarted my undergraduate diploma in [redacted]. This program was about everything I cherished. I explored the designing process, maintaining and constructing roads, dams, bridges, and buildings. I also had the opportunity to learn about construction management with theory and practical knowledge. I could also build my Leadership skills, Problem-solving skills, Project management, Organizational skills, Technical skills, and Creativity skills. While completing my diploma, I plunged for two years for unavoidable reasons. In these two years, I took coaching for my backlogs, and at the same time, with my eye for detail, I took the time to learn in my father's firm and tried to discover how firm management works. I have developed the interest to go for higher education and thus opted for a Bachelor of [redacted]. The course helped me evolve as a capable and motivated individual who consistently performs in challenging environment. I have hands-on expertise in Auto CAD 2D and M.S. Office (Word, Excel & PowerPoint).

I am a detail-oriented [redacted] with more than three years of professional experience. I can work with indispensable supervision and am committed to providing high-quality service to every project, emphasizing health, safety, and environmental issues. I began my professional journey as a Trainee Engineer. I was responsible for visiting the site, collecting preliminary data for further implementation, assisting the Head Supervisor in performing practical and administrative duties. My professional experience helped me hone decent Communication, Collaboration, Time-management and Material Procurement abilities. I also learned how to carry inspection and execution of in-house sewage treatment plants and septic tanks.

Later, I joined my father's construction business as a civil engineer. I was responsible for managing Tenders & Contracts. I worked on document preparation, filing the Financial Bid for E-tender, and the PWD, Irrigation Department. I completed several the construction of a G+3 residential project, Praman Enclave, from its plinth level phase. I also completed the CC Road Kelwad & Minor Bridge Project. I did site inspection in the presence of contractors and suppliers. I implemented environmental-compliant processes. Sharing one instance with you of while working on one project of C.C. Road, my team was working on the excavation part of work in which mistakenly water pipeline got broken and residents had created huge chaos.

I immediately acted by calling water resource department's office and confirmed the site's actual position to stop the water flow, meanwhile I asked my team to regulate the residents of the area. I then called the electric board control to cut the power off so that if any damage can be controlled if water got into the distribution panel. Then by that time, I requested the residentials to cooperate with us and asked my team to dewater the area so that we can repair the water pipeline as soon as possible so that people should not face the water crisis on the next day. The whole task was executed successfully, and residents were quite happy with after job work.

Why UK

Choosing a suitable education destination and university is a big decision. Why I chose UK is because everything suits to my aspirations, from vibrant and diverse campuses to the rigorous programs and commitment to practical learning. It is exhilarating to comprehend how the program merges various concepts under a universal umbrella with an excellent curriculum, well-experienced faculty, labs and ongoing projects in the field. I wish to be a crucial part of a diverse group of students and faculty in addressing the global challenges with engineering solutions. In U.K., I am thrilled to experience a flexible education system, excellent support system for international students, cultural diversity and lastly the lively and vibrant campus life.

Why Master's in construction project management

With this course, I will learn proper methods of planning strategy for executing a project, how to maintain quality standards and reduce the required budgets of the project. The skills I can enhance through this course also include team Management, Leadership, Communication, prioritizing work, setting a goal, and being open to all kinds of feedback. It will also help diversify my knowledge in my fields related to their current areas help me specialize and provide me with advanced personal growth. My short-term goal is to complete my master's with a great credit score then I can implement my previous experience and knowledge gained from my Master program to become a successful entrepreneur and use knowledge and experience to build my firm. Finally, in my current capacity, I feel this program will make me uniquely suited to achieve greater heights in future assignments from a highly academic and interdisciplinary perspective.

Why University of West England, Bristol

The University has a great satisfaction level among students and is ranked among top university. University offers great teaching and providing practical exposure to students while studying. Moreover Bristol is a good place to stay and that is why I have applied to UWE.

I feel assured that the knowledge I have gained through years of education and experience have made me confident to apply and I am eager to join the course and look forward to a positive reply from your side.
